TAXI Companies in Brasov City

Taxis are a faster and more comfortable way to get around town than public transport. Taxis are also relatively cheap. All taxis must have meters and drivers are usually friendly.

Ask the approximate fare in advance and always make sure the driver uses the meter from the start. Check the taxi's door for the price (lei/km).

Do not take just any taxi you will find at the taxi station! The private drivers can charge very high prizes!

Taxis are usually parked in designated areas, which are in the proximity of bus stations or other busy spots. When travelling outside city limits, you may be asked to pay the double fare per km (it is considered acceptable), or you could agree on a fixed amount in advance.

Never get into a taxi that does not have a sign with the company name on top.

Local transportation

The Braşov public transportation network is very extensive and services run late into the night; specialized all-night services are also available.

Tickets can be bought at specialized RATBv kiosks or from newsagents, but remember to punch them in the bus. Even though there are no ticket gates when entering the vehicles, it's advisable to have a valid ticket because ticket inspections are frequent. When someone requests your ticket, always ask them to see a job ID.

One bus/trolley bus 2-ways ticket: 4 lei.
